Florin POP

General Manager ENERGOBIT

Mr. Florin POP is currently the General Manager of EnergoBit, one of the strongest and long-lasting energy service companies in Romania.

With over 25 years of experience in the energy industry, Mr. Florin POP has left his mark on many complex energy efficiency projects. He has been active for Romanian industrial activities in all stages of an energy project: from the technical audit, the issuing of plans of measures to reduce the energy input, the preparation of the financial report, up to the implementation of the proposed measures as well as their monitoring operations.

He joined EnergoBit company in 2001 as a specialist in energy efficiency and soon became the manager of the department. Over time, he held various positions within EnergoBit, coordinating both commercial and operational teams but also activities that drive business growth and development, managing the company's strategy together with the Board of Directors and contributing to the positioning of EnergoBit among the biggest players in the electricity market.

He graduated from the Technical University of Cluj-Napoca, having the qualification of electrical engineer. He also obtained the diploma of certified energy manager from the Association of Energy Engineers and graduate an Executive MBA program organized by Collège des Ingénieurs in Paris.

His concern and involvement in sustainable energy projects also materialized in the scientific/academic environment, through numerous publications, conferences and didactic materials, being a promoter of the concept of energy efficiency.
