Haukur Hardarson
Founder & Chairman- Arctic Green Energy

Haukur Hardarson is the Founder and Chairman of **Arctic Green Energy**, where he leads the company's strategic direction and global business development. An entrepreneur with a track record of building and scaling successful ventures across Asia, Europe, and the United States, he is driven by a vision to develop profitable, mission-led renewable energy solutions that address the impacts of climate change.

Under his leadership, Arctic Green established its flagship joint venture with Sinopec – Sinopec Green Energy (SGE) – which has become the world's largest geothermal heating and cooling company. Since co-founding SGE in 2011, Mr. Hardarson has served as Vice Chairman, playing a central role in its rapid expansion across China and its emergence as a global benchmark for clean, reliable, and affordable energy systems.

Earlier in his career, Mr. Hardarson founded multiple successful ventures in geothermal development, real estate, and mobile marketing. He holds an honors degree in Architecture from the Illinois Institute of Technology and is an Icelandic citizen, dividing his time between Asia and Iceland.
