

Alexandru SANDULESCU

EU High-Level Adviser in energy for the Republic of Moldova

Alexandru Sandulescu is currently EU High-Level Adviser in energy for the Republic of Moldova. With over 40 years of professional activity, Mr. Sandulescu holds an MSc in Energy from the Bucharest Technical University and a PhD in Energy Markets. He also studied utility regulation at the University of Florida in Gainesville, United States and Sherbrooke University in Montreal. Before his current assignment in the Republic of Moldova, Mr. Sandulescu held several key positions in Romanian energy sector, including General Director for Energy at the Romanian Ministry of Economy, General Director at the Romanian Energy Regulatory Authority (ANRE) and Researcher and Programme Director at ICEMENRG, a national energy engineering and research institute.

In his role of EU High-Level Adviser on Energy, he provides policy advice to Moldavian central authorities aiming to create competitive energy markets based on the EU energy acquis; to increase energy security of supply by promoting the gas and electricity interconnections with EU networks to develop a sustainable energy sector by increasing the use of renewable energy sources and through energy efficiency projects. Transposing and implementing EU legislation in energy and the fulfillment of the Moldavian Reform Agenda are also priorities of Mr. Sandulescu.
