Florin POP

General Manager- ENERGOBIT

Florin Pop has been part of the management team of EnergoBit since 2001, during which time he successively held several management positions within the group, including Energy Efficiency Manager, Deputy General Manager and, currently, General Manager. In this capacity, he coordinates the company's commercial and operational activities, as well as strategic development and growth initiatives. With over 25 years of experience in the energy sector and in management, Florin Pop has coordinated major projects, including the construction works for the largest offshore wind farm in Europe, with an installed capacity of 600 MW. He has also managed the construction and retrofitting of over 50 power stations in Romania, as well as the implementation of complex projects for numerous industrial clients.

Florin Pop is a graduate of the Technical University of Cluj-Napoca, specializing in electrical engineering, and holds a master's degree in business administration from the Collège des Ingénieurs Paris. Since 2003, he has been a member of the Romanian Society of Power Engineers.
