Petru RUȘET

Managing Director- Siemens Energy Romania

Dr. Eng. Petru Rușeț has been Managing Director of Siemens Energy Romania since March 2020 and one of the authoritative voices of the energy sector in Romania. With a career spanning over 30 years, he has built his professional profile in some of the most relevant organizations in the field of electricity, occupying coordination and management roles within RENEL, Transelectrica and SMART over time. Since 2007, he has joined Siemens, where he has led activities and divisions in the energy area, and today he leads Siemens Energy Romania in a context in which energy infrastructure, system modernization and the transition to sustainable sources are central themes for economic competitiveness and energy security.

A graduate of the Faculty of Electrical Engineering at the "Traian Vuia" Polytechnic Institute in Timișoara, Petru Rușeț holds a PhD in electrical engineering, with a thesis dedicated to optimizing the operating regime of medium voltage networks. His background also includes management and marketing studies in Germany, as well as an advanced management program at Siemens AG. This path gives him a rare combination of technical depth and executive perspective, essential in dialogues about energy system transformation and large-scale infrastructure investments.

In parallel with his business activity, he is also involved in academia, since 2015 as an associate professor at the Politehnica University of Bucharest and, since 2016, also at FABIZ – ASE Bucharest. He is a member of reference professional organizations, such as CIGRE, WEC and IEEE, which strengthens his profile as a leader connected both to the technological developments of the industry and to the major strategic themes shaping the future of energy.

He also serves as vice president of the Romanian-German Chamber of Commerce and is a member of the Energy Commission of the Romanian Academy.
