Teodor SARU

CEO- Electrogrup

With over 20 years of experience in coordinating multidisciplinary programs and complex projects in Power Generation and Oil and Gas industry, Teodor Saru has distinguished himself through his expertise in strategic and operational management.

His professional career covers both project management, international development positions and leadership roles, holding key positions in leading companies such as Rompetrol, Siemens and Christof Industries, where he has developed a solid expertise in integrated project delivery, implementation of innovative technological solutions and the use of renewable energy sources. Under his leadership, the activity of these companies expanded into Central and Eastern European markets, including Hungary, Serbia, Bulgaria and Croatia.

Since 2023, he has joined Electrogrup, part of the E-INFRA Group, initially as Chief Operations Officer, and since 2025 he has taken over the role of CEO, bringing a vision oriented towards innovation and sustainable development.

He holds a degree in Electronic Engineering from POLITEHNICA University of Bucharest and holds an MBA in Management from INDE. Teodor is also a certified Project Management Professional (PMP), being a significant marker in revealing his skills in project management and performance.

Currently, at Electrogrup, Teodor continues to accelerate the development of the company through a strategic focus on sustainability, technological innovation and regional expansion, distinguished by professionalism and the ability to turn challenges into opportunities for growth and performance.
