

Alexandra CERNIAN

Associate professor at the Faculty of Automation and Computers at the National University of Science and Technology Politehnica Bucharest

Alexandra is associate professor at the Faculty of Automation and Computers at the National University of Science and Technology Politehnica Bucharest and she successfully combines the roles of academic, entrepreneur and expert in digital innovation. She is co-founder of the startup Recycllux and an expert evaluator in digital innovation for the European Commission.

With a PhD in Systems Engineering, Alexandra is passionate about Artificial Intelligence and Blockchain, focusing on bringing digital innovation and competitiveness closer to companies and the community in Romania. She has participated as an expert in numerous national and international projects, contributing to the development of innovative and sustainable solutions.

Her academic portfolio includes numerous books, book chapters and scientific papers published in prestigious international volumes. In parallel, Alexandra works as a mentor and coach in incubation programs and business accelerators, being an important pillar in supporting tech startups. She also collaborates with entrepreneurs to develop innovation strategies and implement competitive digital solutions.

Through her multidisciplinary work, Alexandra dedicates her expertise to supporting technological progress, sustainability and entrepreneurship, actively contributing to Romania's digital transformation.
