Cristian PIRVULESCU

Co-founder & CEO of ENEVO Group

Cristian Pirvulescu is a Romanian entrepreneur and energy expert.

As co-founder and CEO of ENEVO Group, Cristian built an international company having solid expertise as EPC Contractor for power generation, power transmission and distribution, automation and cybersecurity for critical infrastructures. Under his leadership, ENEVO grew business on 4 continents, with offices in Romania, Germany, the Kingdom of Saudi Arabia and the UK, working for the most prestigious utilities in the world. He carefully put together over the years young engineers and ambitious individuals who grew into a multidisciplinary team able to implement a wide range of digitalization and energy transition type of projects, encouraging the development and adoption of new technologies. From energy dispatch centres, energy efficiency projects, complex automation and smart grid applications to proprietary technology development for ensuring the cybersecurity of the power grid, the company became a market leader and a highly respected engineering partner.

Cristian Pirvulescu served as a member of the Supervisory Board of Transelectrica SA (Romania's Transmission System Operator), Associate Professor with the Bucharest University of Economic Studies (MBA), Director of the Energy and Infrastructure Department of European League for Economic Cooperation and Director of the Aspen Institute Energy and Sustainability Program in Romania.
